Home Modification Programs and Practices

Following is a list of evidence-based programs, many of which are available across the country, and best practices at the national, state, and local levels related to home assessments and home modification.

Categories and Criteria

1. **Evidence-Based Program Criteria (U.S. Administration for Community Living’s highest level benchmarks for evidence-based programs):**
   - Demonstrated through evaluation to be effective for improving the health and well-being or reducing disease, disability and/or injury among older adults;
   - Proven effective with older adult population, using Experimental or Quasi-Experimental Design; and
   - Research results published in a peer-review journal; and
   - Fully translated in one or more community site(s); and
   - Includes developed dissemination products that are available to the public.

   *Experimental designs use random assignment and a control group. Quasi-experimental designs do not use random assignment.

   **For purposes of the Title III-D definitions, being "fully translated in one or more community sites" means that the evidence-based program in question has been carried out at the community level (with fidelity to the published research) at least once before. Sites should only consider programs that have been shown to be effective within a real-world community setting.*

   - Addresses fall prevention programming as a strategic priority;
   - Is sustainable and has been operating at least one year;
   - Can measure performance and incorporates performance measures in a continuous improvement effort;
   - Has established and nurtured strategic partnerships that expand its reach and service delivery and sustainability;
   - Has established processes for referring participants to other services;
   - Is reaching those older adults in need; and
   - Demonstrates a vision and the capability to expand to meet demand.

   These reflect the evidence regarding characteristics of successful home safety programs offered in the context of fall prevention:
   - Professionals play an important role in promoting older adults’ efforts to reduce fall risk in the home.
   - Partnerships are established to link seniors to needed services.
   - Observation of the older adult performance and function is included in the home assessment.
   - Outcomes are evaluated with the feedback serving a continuous quality improvement function.

3. **Innovations Criteria:** these home modification efforts include outstanding components that distinguish them from basic home modification delivery services

| A Matter of Balance [link](https://mainehealth.org/about/healthy-communities/healthy-aging/matter-of-balance) | **Goals:**  
▪ Reduce fear of falling  
▪ Increase activity levels | **Delivered By:**  
▪ 2 coaches (volunteer lay leaders) teach the class to participants  
▪ Guest therapist visit (1 session for 1 hour) | **Licensing Cost:** Everything is included in the training fee  
**Training Cost:**  
▪ Master Trainer session (includes all materials): $1,500 per Master Trainer plus travel  
|                           | **Target Audience:** Adults 60+ who are ambulatory, able to problem solve, concerned about falling, interested in improving flexibility, balance and strength and have restricted their activities because of concerns about falling | **Training Requirements:**  
▪ Master Trainers: 2-day training and on-going updates  
▪ Coach/Lay leader training: 8 hours, attend annual 2.5-hour training update | **Post-training Materials Cost:**  
▪ Coach Handbook: $20  
▪ Participant Workbook: $13  
▪ Guest Therapist Handbook: $6  
▪ DVD (Fear of Falling and Exercise: It's Never Too Late): $164.76/set  
▪ A Matter of Balance DVD: $11.00  
▪ A Matter of Balance Lay Leader Model CD-ROM for Coaches: $2.00 | Please visit the website for the most recent Matter of Balance cost information. |
|                           | **Description:**  
▪ 8 weekly or twice weekly sessions  
▪ 2 hours per session  
▪ 8-12 group participants  
▪ Emphasizes practical coping strategies to reduce fear of falling and teach fall prevention strategies  
▪ Structured group intervention activities:  
  o Group discussion  
  o Problem-solving and skill building  
  o Assertiveness training  
  o Videos  
  o Sharing practical solutions  
  o Exercise training |"

| CAPABLE: Community Aging in Place, Advancing Better Living for Elders [Link](https://nursing.jhu.edu/faculty_research/research/projects/capable/index.html) | Goals: To reduce the impact of disability among low income older adults by addressing individual capacities and the home environment  
Target Audience: Low income older adults  
Description: ▪ 5-month, client-led program  
▪ Occupational Therapist provides up to 6 home visits, Registered Nurse (up to 4 home visits), handyman (full day’s work of home mods, assistive devices, and repairs)  
▪ Directly addresses all risk factors for falls: medications, low vision, decreased leg strength, safe ADL ability, and home safety risks  
▪ Addresses participants’ own goals, e.g., to get upstairs, take a shower, or walk out the front door—and barriers that interfere with achieving these goals | Delivered By:  
▪ Occupational Therapist (OT)  
▪ Registered Nurse (RN)  
▪ Handyman  
Training Requirements:  
▪ Training curriculum for Occupational Therapists and Nurses, including self-paced electronic modules and an interactive in-person or Skype-type training  
▪ Follow-up support calls once clinicians start to implement CAPABLE  
▪ Training manual for both Occupational Therapists and Nurses included | Most costs are staff costs (RN, OT, and Handyman)  
▪ Interventionist training time  
▪ In-home visit duration  
▪ Travel time  
▪ Supervisory meetings  
▪ Care coordination time between OT, RN and handyman  
Non-staff time costs include:  
▪ Supplies and labor for home modifications, repairs, and assistive devices  
▪ Program materials  
| FallScape [Link](http://www.fallscape.org/) | Goals: ▪ Increase falls prevention behaviors and falls self-management skills  
▪ Improve recognition of fall threats and self-efficacy  
▪ Enhance fall threat recognition and prevention behaviors with multimedia  
▪ Prevent participant falls and reduce fall risk. | Delivered By: One to four trained facilitators  
Training Requirements:  
▪ Interview, follow-up and telephone check-ins; multimedia training and evaluation can be | Licensing Cost: Included in training costs.  
Training Cost: FallsTalk training plus $250 - $490 depending on program components (1 or 2 days which must be taken separately from FallsTalk training and each other); Package includes training, | Schepens SL, Panzer V, Goldberg A. <td>Healthy Steps for Older Adults <a href="https://www.aging.pa.gov/aging-services/health-wellness/HealthyStepsFallPrevention/Pages/default.aspx">https://www.aging.pa.gov/aging-services/health-wellness/HealthyStepsFallPrevention/Pages/default.aspx</a></td>
<td><strong>Description</strong>: Older adults receive 1-3 one-on-one visits over one month with an occupational therapist (OT) in the home. During the first visit, the OT completes assessments of the older adult's abilities and awareness of fall risk behaviors. Next, the older adult and the OT work together to identify hazards in the home that increase the older adult's risk of having a fall. Then, the OT and the older adult identify appropriate solutions to remove those hazards and increase safety in the home. HARP aids in removing the home hazards, providing simple modifications and education on fall risks and strategies to address fall risks. More complex modifications are addressed in future visits and may include a contractor for installation.</td>
<td>The occupational therapist provider manual is available for $40 plus shipping and handling. Contact <a href="mailto:peplab@wustl.edu">peplab@wustl.edu</a> to order. The HARP implementation toolkit for delivery in congregate living facilities is available for $50. Contact <a href="mailto:peplab@wustl.edu">peplab@wustl.edu</a> to order.</td>
<td><strong>Healthy Steps for Older Adults workshops are offered at no charge through Pennsylvania’s 52 Area Agencies on Aging. Other organizations and facilities outside of Pennsylvania’s Area Agency on Aging network can purchase a license to train Workshop Leaders and to conduct workshops. For more information on costs, email <a href="mailto:wellness@pa.gov">wellness@pa.gov</a>.</strong></td>

| SAIL (Strategies and Action for Independent Living)  
[https://www.sailfitness.org/](https://www.sailfitness.org/) | **Goals:** Physical activity program that reduces fall risk factors by increasing strength and improving balance  
**Target Audience:** Community-dwelling adults 65 years and older with a history of falls. SAIL is able to accommodate people with mild mobility difficulty  
**Description:** SAIL is offered three times a week in a 1-hour class. The duration of the class is determined by the organization providing it. The recommended class size of 8-15 people. The class includes warm up, aerobics, mandatory balance exercises, mandatory strength exercises, stretching, and education, which includes the topic of home safety. The exercises can be done standing or seated. | **Delivered By:** Fitness, exercise science, and healthcare professionals who have completed the SAIL Instructor training.  
**Training Requirements:** Instructors must complete online or in-person training. Experience working with and teaching physical activity to older adults is preferred, and current CPR and First Aid certification is recommended.  
**Delivered to:** PACE participants and their families through a home visit or telephone.  
**Costs:** SAIL is a public-domain program. There are no initial site license fees and no yearly renewal fees for conducting SAIL classes. The program can be provided free of charge or for a small fee for seniors as an approved Administration for Community Act Title 3D funding requirement. | Stepping On [link](https://www.ncoa.org/article/evidence-based-falls-prevention-programs) | **Goals:** Offer strategies and exercises to reduce falls and increase self-confidence in making decisions and behavioral change in situations where older adults are at risk of falling  
**Target Audience:** Community-residing, cognitively intact older adults who are at risk of falling, have a fear of falling or who have fallen 1+ times in a year  
**Description:**  
- 7 weeks, 2 hours per week  
- A home visit or follow-up phone call by the program leader to facilitate follow-through with preventive strategies and to assist with home adaptations  
- 2-hour booster session after 3 months  
- Format includes workshops; balance and strength exercises during sessions and at home; guest expert presentations on topics including exercise, vision, medication management, and community safety; fall risk self-assessments; and a display of items to prevent falls. | **Delivered By:**  
- Trained leader  
- Trained peer leader  
**Training Requirements:** 3-day training for Leaders | **Licensing Cost:** First 3-year license included in the training cost  
**Training Cost:** On-site Wisconsin training (includes Stepping On Manual, weights, toolkit, and one fidelity check by video per Leader):  
- Wisconsin residents: $250  
- Non-Wisconsin residents: $1,500 for 1-2 people; $1,200 for 3+ people

<td>SHL clients are older adults who have been recently discharged from home care or the hospital, have chronic diseases, or are no longer eligible for insured home care, but who still need occasional monitoring and educational reinforcement to maintain their independence. In addition, SHL serves low-income and Hispanic elderly individuals who have limited access to health resources and/or lack transportation.</td>
</tr>
<tr>
<td>VNA of Care New England: Steady Strides (Warwick, RI) <a href="https://www.vnacarenewengland.org/fall-prevention">https://www.vnacarenewengland.org/fall-prevention</a></td>
<td>The goal of Senior HealthLink is to allow older adults to age in place while maintaining optimum health for as long as possible. including a home safety program, it is a free outreach program that benefits people age 65+ who have multiple medical issues and whose family are caring for them. It serves a low-income community and reaches a broad audience of older adults that includes frail individuals, while providing valuable hands-on experiences for senior nursing students. Initial visits are made following the return home from the hospital or emergency room. The Senior HealthLink program, in collaboration with the Chester County Health Department, developed a Home Safety Survey that student nurses administer during visits to older adults’ homes. In addition, NHA uses a Fall Risk Assessment Form it developed that includes medication side effects, home safety and environmental factors, existing medical conditions, inactivity and mobility, nutrition, and hydration. The home visits are continuous and the assessment is tied to the case manager process, which ensures that referrals and minor modifications are completed. The strategic partnerships of Senior HealthLink with the Chester County Department of Health, Random Acts of Kindness Everywhere (Project RAKE), Good Works, and others expands the service capability of this program.</td>
<td></td>
</tr>
<tr>
<td>VNA Steady Strides program offers a comprehensive fall risk assessment for a high-risk population of skilled home care recipients and their caregivers throughout Rhode Island. <td>Independent Living Solutions (Grand Rapids, MI) <a href="https://www.dakc.us/occupational-therapy/">https://www.dakc.us/occupational-therapy/</a></td>
<td>Headquartered at Disability Advocates of Kent County and a partner with the Area Agency on Aging, this program uses creative funding from a variety of sources including Kent County Senior Millage, Community Development Block Grants, Disabled American Veterans, and a private foundation. They assess the person, home, and environment to identify barriers to independent living. An Occupational Therapist assesses and implements a plan to make the home accessible through modifications and/or equipment. They also offer “Accessibility Consultation for New Construction or Remodeling” wherein they will review plans to ensure accessibility. They also have an Equipment Loan Program for DME and offer classes in Aging in Place Solutions.</td>
<td>Consumers 50+ in Kent, Ionia, Montcalm, Mecosta and Osceola Counties and other local counties who meet income guidelines.</td>
</tr>
<tr>
<td>North Dakota Assistive Technology, Home First Program (Statewide) <a href="https://ndassistive.org/asdds/">https://ndassistive.org/asdds/</a></td>
<td>Home First has a “real home” environment for consumers to learn about home modification, a “real home” IPAD app, and a YouTube channel where people can explore and try out different types of assistive technology devices to help them stay safe and active at home. They have a team of Certified Home Modification Specialists and assistive technology specialists to help identify needs and make recommendations. Home First allows individuals to try out the assistive technology through a rental program.</td>

<tr>
<td>Chester County Home Modification Program (CCHMP)</td>
<td>CCHMP is funded by a grant received from the Pennsylvania Department of Community and Economic Development's Keystone Communities Program. It provides a wide range of adaptive modifications which include, but are not limited to, ramps, lifts, door and hallway widening, kitchen and bathroom modifications, visual doorbells, audio phones and visual phone signalers. Funding modifications is in the form of a grant and repayment is not required.</td>
<td>Participants must have permanent disability that limits access to and use of the dwelling, be a homeowner, and household income must not exceed 80% of the area's median income.</td>
</tr>
<tr>
<td>United Disabilities Services (UDS) Foundation (Lancaster, PA)</td>
<td>The UDS Foundation, a non-profit, provides services to people with disabilities of all ages, including Veterans and the elderly, throughout South Central Pennsylvania. Their home modification program provides individual assessments, home evaluations, feasibility assessments, and full construction and installation to make homes more accessible and convenient, including ramps and door/hallway widening, accessible kitchens and bathrooms, bedroom and bathroom additions, and automatic door openers. They also operate a Home Accessibility eStore.</td>
<td></td>
</tr>
<tr>
<td>One Step Ahead Fall Prevention Program (Seattle, WA)</td>
<td>Headquartered at the King County Emergency Medical Services Department, this program provides free home safety visits by a physical therapist or physical therapist assistant to address potential fall hazards, educate about staying safe in the home, install fall safety devices, and inform about community resources. It partners with Rebuilding Together Seattle. The program started as a study in 2003 and grew to where over 2000 seniors have enrolled in the program.</td>
<td>Participants must be 50 years plus, have fallen or be at high risk of falling as assessed by a healthcare professional and live in King County.</td>
</tr>
<tr>
<td>Safe at Home Program for District Seniors (Washington, DC)</td>
<td>District of Columbia Department of Aging and Community Living (DACL) and the Department of Housing and Community Development work with contractors through (CSBG) to offer Safe at Home. Administered by Home Care Partners, a DACL grantee, Safe at Home helps older adults and residents living with disabilities age in place. It provides preventative adaptations to</td>
<td>Available to seniors ages 60 and older and persons living with a disability age 18-59. Eligible households receive accessibility adaptation grants up to $10,000 to cover equipment and labor costs. Staff located at Home Care</td>
